Customer Reviews

Interesting how so many people are not interested with this book because of a very controversial choice. I admire Jim Murray tremendously for making a good quality whisky at an affordable price his top choice. That takes some doing and it is great that an influential author is finally bringing a well needed balance to the industry. There are so many varieties of whisky out there it is a mine field of choice. Some will charge you an absolute fortune for quality that can be had for much less. But here's the problem. There's so much variety Whisky is now becoming very very difficult to categorise and define. It's a wonderful problem to look into but... it has led me to believe only that one can't ever really provide a whisky of the year. I've never understood how someone can say an amazing Rye whisky is better than an amazing bourbon or an amazing single malt speyside is

better than an amazing single malt from Islay based on points. The results are different they are different categories and have their own unique flavour and profile. It's one of the reasons I give a low score to his work and will continue to do so. I just don't see how you can lump in one place so many different styles of whisky and compare them. I also don't understand how it helps the reader giving whisky A 90 points whilst whisky B 95 if again the categories are so different. Both are obviously good you would be better buying both or choosing out of your preferential style of whisky. Indeed if you have type of whisky preference you will subjectively decide which you prefer. When different styles of whiskys are rated above each other like this the point system is pointless.
