# Learning Alfresco Web Scripts

## Synopsis

Learn a powerful way to successfully implement unique integration solutions with Alfresco About This Book Learn the fundamentals of Web Scripts to implement your own custom REST APIs on top of the Alfresco repository Implement customized business solutions effectively and gain comprehensive knowledge about the power of Alfresco Web Scripts Learn everything you need to know about framework components and implementation in a step-by-step, practical manner Who This Book Is For If you are an Alfresco developer who has no experience with web scripts and you want to start developing Alfresco web scripts, then this book is definitely for you. What You Will Learn Implement web scripts in Alfresco and learn about their fundamentals Understand the end-to-end execution flow with core details and get an insight into the robust web script framework Gain extensive knowledge about the building components of web scripts Explore different options to invoke Alfresco web scripts Leverage the power of useful JavaScript APIs in web script implementation Understand various deployment options, debugging techniques, and troubleshooting pointers Learn about extension capabilities to extend the web script framework In Detail Alfresco web scripts is a key feature of the Alfresco enterprise content management system that enables other applications to interact with the Alfresco repository in a secure way. This book will help you understand everything you need to know about web scripts so that you can practically apply them to your own projects. You will begin by learning the basics of Alfresco web scripts, giving you a clear idea about how web scripts are a useful solution to your business problems. Moving on, you will delve into the powerful web script framework and then get a complete walk-through of all the components required to build web scripts. Later in this book, you will discover various ways to execute web scripts. You will learn about useful JavaScript APIs in Alfresco that you can leverage when building business solutions with web scripts. Moving further, you will learn about deployment, debugging, and troubleshooting web scripts, and find instructions to develop web scripts in a Maven project that will help you learn how to build web scripts in a real development environment.

## Book Information

File Size: 2030 KB

inÂ Books > Computers & Technology > Web Development & Design > Content Management

#312 inÂ Books > Computers & Technology > Web Development & Design > Web Services #1095

inÂ Books > Computers & Technology > Programming > Web Programming > JavaScript

## Customer Reviews

Packt sent me a free copy of Ramesh Chauhan's Book "Learning Alfresco Web Scripts" , to read and review.I have just finished up my reading and thought of writing a quick review on the book.First thing which came to my mind while reading the book is "Thankfully someone thought of writing book on this topic". I have never found good documentation about web scripts along with covering all the aspects of web scripts at one place. I was also curious to learn more about this topic as I have been working in Alfresco for many years and have experienced importance and need of web script in all my projects. This book will be more useful to developers who are using Alfresco as a backend and wants to use web script to interact with frond end application. You will get most from the book if you don't have prior experience on writing Web Scripts.This book is very well written and flows logically from one chapter to next and it covers pretty much all you need to know as a developer. This book is completely technical and I like reading behind scenes in terms of implementation of the web scripts and how and when those should be apply in different situations .I could tell a lot of effort might have gone to put all this together. I would request reader to especially read the Notes section, it makes use of informative tips that would be real help while implementing complex web scripts.In the first chapter I found a good overview about web scripts and more importantly it explains benefits of using web scripts for developer and business users. I also appreciate the section that describes its implementation in support and developing projects.
