Looking forward to the future of 3D printing. I think if clever entrepreneurs and stylists team up to create useful and innovative products using these new technologies there will absolutely be a revolution in what can be done in terms of materials generation. Nice introduction to the subject matter and got my mind running on some of the possibilities. Also the Chinese version of the e-book I found in the related list was pretty smooth too! Not a bad idea to have some Chinese staff running your manufacturing when it comes to 3D printing centers... Shenzhen is like the new Mecca of electronics so they say. Better than Silicon Valley!
