The Personal Internet Address & Password Logbook (Red)

Synopsis

Now in red! Are you tired of losing track of the user names and passwords you create every time you visit a new website? Now you can keep important website addresses, user names, and passwords in one convenient place with this logbook! This time- and headache-saving little organizer contains 144 pages, including tabbed alphabetical pages with room for website addresses, user names, passwords, and additional notes. Spiral binding allows pages to lie flat for ease of use. Handy elastic band closure. Additional pages in the back allow you to record home network configurations, software license numbers, other notes. Removable label, discreet cover design. 4-1/4" wide x 5-3/4" high

Best Sellers Rank: #16,162 in Books (See Top 100 in Books) #86 in [Books > Computers & Technology > Internet & Social Media](#) #4639 in [Books > Reference](#)

Customer Reviews

I just received my "little black book" and I LOVE it. It is small enough to take with you if needed (about the size of 4" x 6" index card), has a spiral binding allowing to fully open to write in, hard cover with good protection and lots of pages to store my info. It's very discreet and easy to hide if need be. I've been using an address book from the dollar store up to this point, which filled my needs and was OK, but a bit messy at times. However, with this book I have set places for the websites themselves, my user-names and passwords. In addition, there are a few lines for notes, which I use for security questions on that site. I tend to take care of most things via the computer and I love knowing that if something should ever happen to me, my family will be able to access everything they need in one neat, alphabetical place. (Not to be morbid, I'm just a planner). I love my book and for the price, I couldn't be happier. I just wish I purchased it sooner! *** Please note I bought this book in black, not the red as pictured. I'm not sure if the color changes from year to

year, but the red would be just as nice I suppose ***

I bought this one for the spiral binding. Unfortunately, because the front and rear covers are connected over that binding, you can't lay the pages flat. Hard to explain, but the pages are on a slant because the cover requires them to be. If the cover was 2 pieces, then the pages could lie flat on the spiral. Also, the tabs, while helpful, don't extend beyond the edge of the page, they are cut out of the page. Therefore you can't grab the tab and go, you have to kind of flop the book back and forth to grab the tab. I liked my previous one better (which I got from an organizing store whose name starts with container and ends with store), but it had gotten too messy with all my password changes.. I should have paid extra for that one, I think. As to writing down my passwords, I can see the security weakness in that. However, my bank card wasn't hacked from my password book, it was hacked from Target, through Target's security and firewalls. I don't really trust the electronic password savers to be unhackable. I put shorthand notes to myself in my password book, so the full password isn't there, but it will remind me what the password is. Again, not the most secure, but better than nothing, and as another poster said, if someone breaks into my home, I'll bet they'll be going after the family silver and the electronics, not rooting through my drawers looking for a password book... And, if they do break in for my password book, at least I'll have forced them to get dressed and leave the house and put in a little physical work for it ;-)

I've been looking for a book to contain all my many, many passwords besides on little pieces of paper stuck in my desk. This book is a perfect size for my desk and has just the right spaces for user name, password, and a note about the website. I agree with everyone else you need to fill it out in pencil.

Small enough that I can have it right next to my keyboard. I love the A-Z indexing as it makes it easy to find my passwords. It also has a red elastic band that I can keep the book closed and take with me. Good quality, a lot of extra pages to add web sites and passwords - wonderful!

I have tried to invent my own record-keeping system for passwords, but nothing really worked. This little book is exactly what I needed--I absolutely love it ! It is perfect --couldn't be more satisfied !

This book arrived faster than usual. I'm thrilled with the book. I have another internet logbook from another company and this one is soooo much better and was LESS expensive. This one is for a gift

and I know she will be surprised and very pleased especially when I show her mine. Great book with a great price.

I had to buy another one because this was really small, I did like all the lines they included for each entry, the other book I bought was not as inclusive

Nice little logbook I like the compact size but I don't really care for the binder style ring for this size of book it makes it difficult to write down info on the left side of it, otherwise it has plenty of space to do what was intended to be done with it.
