# Flash CS4 Professional Digital Classroom, (Book And Video Training)

Synopsis

Flash CS4 Professional Digital Classroom is like having a personal instructor guiding readers through each lesson, while they work at their own pace. This book includes 13 self-paced lessons that let readers discover essential skills and explore new features and capabilities of Adobe Flash Professional. Every lesson is presented in full color with step-by-step instructions. Learning is reinforced with video tutorials and lesson files on a companion DVD that were developed by the same team of Adobe Certified Instructors and Flash experts who have created many of the official training titles for Adobe Systems. Each video tutorial is approximately five minutes long and demonstrates and explains the concepts and features covered in the lesson. This training package shows the basics of using the program, such as using layers and instances to build animation sequences, as well as advance features, such as using ActionScript to create interactive Web page components. Jam-packed with information, this book and DVD takes users from the basics through intermediate level topics and helps readers find the information they need in a clear, approachable manner. Note: CD-ROM/DVD and other supplementary materials are not included as part of eBook file.

Customer Reviews

This book by Fred Gerantabee and the AGI Creative Team is a great book if you are learning Flash or just want to learn how to use the new features in Flash CS4 Pro. This book is sectioned into 15 lessons beginning with an introduction to Flash, a touch of ActionScript and ending with advanced

animation techniques.If you are a beginner, start each lesson by viewing the matching video tutorial found on the book's DVD. It will familiarize you with the tools and techniques that you will be using in the lesson. Then you will find the step-by-step lessons easier to follow. Besides the video tutorials, the authors included a "putting it all together" section to show how the techniques being discussed work together. Most of the lessons are project-based, which is a good way to learn something new.There are some significant changes to Flash CS4. The authors discuss the new UI, Deco and Spray Brush drawing tools, as well as the new 3D tools, Alignment panel and importing native Photoshop and Illustrator graphics. They also introduce the new animation tools including Motion Presets, Motion Editor and IK tools.After the introduction, the authors give you practice with the drawing tools, text, colors, layers and all the basics for creating objects on the stage. Next, you start a web banner project and prepare for animation by discussing symbols, the Flash Library and how to organize your movie assets. Your next project is an animated ad featuring a worm. You will use the new Deco and Spray Brush tools to create symbols and then use the Bone tool to make the worm posable, in preparation for adding IK and animation. Finally, you are ready to learn Flash's new object-based frame by frame animation with a web banner project.
