Customer Reviews

A passionate home cook that has been honing her cooking skills for the last 25 years writes this review. My favorite cookbooks are "The Professional Chef" by the Culinary Institute and "Culinary Artistry". This book is exactly what I expected it to be, a vast collection of information regarding canning, and freezing, curing, and drying food. I purchased this book last year after I decided to eliminate all preservative, chemicals and dyes from our food and had difficulty locating reasonably priced products that were prepared naturally. I remembered that my parents had gone through a hippy phase when I was young and found an old version of this book at their house. Since they wouldn't give up the book I bought my own copy and have learned a lot on preserving food from this

book. The book is subdivided as follows: 1. What is It? 2. Why Foods Spoil 3. Altitude and Metrics 4. Fair Warning 5. Common Ingredients and How to Use Them 6. The Canning Methods 7. Canning Fruits 8. Canning Tomatoes 9. Canning Vegetables 10. Canning Meats 11. Canning Seafood 12. Canning Convenience Foods 13. Getting and Using a Freezer 14. Freezing Fruits 15. Freezing Vegetables 16. Freezing Meats and Seafood 17. Freezing Convenience Foods 18. Jellies, Jams, and Other Sweet Things 19. Pickles, Relishes, and Other Spicy Things 20. Curing with Salt and Smoke 21. Drying 22. Root-Cellaring 23. Putting By Presents for Christmas

This book has been able to answer any question that I have had about canning and freezing food.
