Customer Reviews

This is not your typical collector's handbook listing objects and possibly briefly describing them and listing going prices. This coffee-table quality book with the title "Collecting Japanese Antiques" is a survey of Japanese art works and cultural items with sections of advice for collectors. The historical and cultural background on the different items favors what would be of interest to collectors. But it is also informative and relevant simply for its artistic, historical, and cultural material. Readers looking for concentrated information on Japanese art and culture accompanied by attractive color

photographs would find this work exceptionally suitable. For the collectors it is meant for particularly, there's sections on "Tides and Trends in Collecting," guidance in developing collections of certain items (e. g., baskets), lists of artists, notable regions and schools for certain antiques, and especially desirable objects in certain categories. Seton also moves to the technical subjects of materials, production, and workmanship which are important for collectors not only in appreciating items and assessing their value, but in making a preliminary decision about their age and authenticity. Among Seton's 13 categories of antiques are screens and scrolls, ceramics, furniture, sculpture and metalwork, dolls, and tea ceremony utensils. Seton has lived in Japan since 1972, where he currently teaches Japanese art and poetry. In 1993, he founded the quarterly magazine "Daruma" to cover Japanese art and antiques; which he still edits. "Collecting Japanese Antiques" is a work any collector or lover of Japanese art and antique objects will want for sound education and easy reference, and at times for enjoyably looking at the numerous color photos of the varied Japanese objects.

If you love Japanese antiques, you cannot live without this survey, with superb photography, spectacular taste, eclectic choice, and scholarly background by the editor of Daruma magazine. All of the major collectible fields are covered with practical, informative text, and beautifully photographed select finds. The photographic choices are representative, varied and exquisite. Not merely an introduction, the work serves as a springboard to understanding and appreciating many of the accessible antiques from the Edo and Meiji periods in particular. If the book had an index of marks for each type of collectible, it would be perfection. As-is, I like the book so much that I have bought extra copies for my friends, and a new copy when mine started to get worn.

This book is a real treasure. If you buy just one book about Japanese art and antiques, this is it. Its presentation, descriptions and explanations are excellent. Reading this book is learning and pleasure at the same time. I know the author personally and one can really see in this book his love and dedication to Japanese art. For everybody who wants to learn more about Japanese art and antiques I strongly recommend the magazine "Daruma" which is edited by Alistair Seton. Markus Zenhausern, Kobe, Japan

I bought this book for my husband and he loves it. Then I bought another for my son-in-law. We collect Japanese art, ceramics, furniture and other antiques from Japan. This book is helpful for evaluating what we already own and also will help in future purchases.

An excellent, broad but not deep, coverage of a wide range of Japanese antiques. Good initial look for the beginning collector of orientalia.
