Dave Webster, author of *You Should Do Voiceovers*, uses his no-nonsense approach to help readers set up their own home recording studios. You can use a computer or an iPad, and with a microphone, software and the step-by-step instructions in this book, you are well on your way to earning money recording voiceovers. The book has links to free software as well as information on using a high-quality, reasonably-priced USB microphone. He goes into such accessories as getting a microphone stand, headphones and even has a link to a *œstudio in a box*. Webster shows you how to use phone patches when recording for an outside studio. He even has a suggestion on where, in your home to record from. It is the closet, because the clothing dampens outside sounds and reflections. The book includes easy-to-understand instructions on using WavePad, which is free software for recording voiceovers. He discusses editing, making backups and sending files over the internet. Included are links to other resources that will help you with both the technical as well as the business sides of voiceover recording.

Dave has done it again! Clear, accurate, easy-to-follow instructions on how to setup your own home studio. I've been recording at home for many years and was surprised to learn more helpful tips about the recording process. I wish Dave had written this book earlier, so I wouldn't have made so many costly mistakes when I first started. Buy this book. It will save you a lot of time and money!
