I started making soap back in 2000 and Susan Miller Cavitch's "The Soapmaker's Companion" was

my bible. So I was hesitant when people started ranting and raving about this book. After purchasing it I have to say it is all that is promised and more. While I still adore Cavitch's book, there are a couple of reasons I would recommend Watson's book for beginners:1) It is completely up to date. Not only does she mention using modern stirring methods (stick blender), all of her resources are up to date and impressive. I am a fan of most of the suppliers she lists and was familiar with them.2) Her recipes are SO accessible! Cavitch's recipes tend to require more "exotic" oils and have a bit of Julia-Child-laundry-list of ingredients. Anne Watson's recipes are bare bones and truly what they claim to be. Her Grocery Store soap ingredients can be bought at any national chain store. Love it! (my only minor complaint is that her recipes make such SMALL batches. I end up having to double most of them.)3) She provides an excellent guide to making your own recipes. Most soap books (Cavitch's is a little guilty of this) just assume you'll figure it out on your own, or that you'll only make their recipes forever. Watson walks you through creating your own recipes step by step in crystal clear detail.4) She expresses the correct amount of caution with lye. Some books bog you down with details on how dangerous it is and make you feel as though you should be wearing a hazmat suit while measuring it, while others have a lackadaisical attitude towards it and don't stress safety. Watson communicates that it needs to be treated carefully, but that you don't need to freak out over it.5) Last, but not least, Watson is contactable.
