Who knew that basic items in your pantry would make great natural shampoos? In *Homemade Shampoo: A Complete Beginner's Guide To Natural DIY Shampoos*, you will learn tips and techniques for maintaining a natural, chemical free hair maintenance program. Not only are these recipes easy to make which of course there are 34 of them, but they are low-cost and the plus side is that they are non-toxic. There are recipes for all types of hair from dry hair to oily hair there's a recipe for everyone. I loved the recipe that included peppermint because my scalp felt so clean and re-energized that I shampooed my hair three times with. Then after my hair was dry I oiled my scalp with some lavender oil. And yes, I use it at night so I could have a good night's rest. If you want great hair, and a clean scalp on a budget then this book will help you to achieve that. Don't wait, get a copy and start growing great hair today.

Homemade beauty products are a thing that I have gotten into for a very long while. Whether you're a know this, or an expert, it's always good and informational to get new ideas and information on how to improve your homemade products and obtain the additional benefits from and ob This book definitely start you out on the very great path of learning how to create the basic Foundation shampoos for yourself and reap the benefits of creating your own shampoo from homemade with clean ingredients which does the same job and holds up just as well as store bought shampoos which has a lot of chemicals and other unnecessary stuff in them. I think for anyone that starting on the homemade beauty regimen Journey as I call it is very exciting to create a homemade product

and see the benefits of how will it hold up compared to the amount you used to spend paying per bottle of shampoo off the shelf. I think it's also great and encouraging because it also gets you away from the unnecessary chemicals and stuff you would put on your scalp, and just an all necessary feel good knowledge that your obtaining a product that does the job with a fraction of the cost. This is a definitely a great read that'll get you on the path to creating more complex recipes later on. Also for those that like do it yourself gifts these also I think we'll make cute little gifts if you're making Beauty baskets around a special holiday or birthday as well

I'm in love with this ebook! It gives you a very detailed description why you should switch from ordinary shampoos to homemade shampoos, you'll learn every benefit of a DIY shampoo. The recipes are very easy to follow and understand, and the ingredients are not hard to get. I've already tried the lavender and bergamot milky mix and the shiny strawberry shampoo, they do wonders with one's hair! Absolutely recommended.

What an amazing book - it's an eye-opener. I never thought that homemade shampoo has that many benefits. Now I understand why I often have problems with dry scalp. I definitely will change my habits and start making my own toxin-free shampoo. This book is a really great guide towards making your own shampoo and it offers a great variety of shampoo recipes for beginners and advanced. I highly recommend this book.

I'm trying the Calming Chamomile and Rosemary Shampoo and as soon as I've tried it for a week or so I'll post back here. This is a great book, I would have never, in a million years thought about trying to to make my own shampoo! But with the help of this book, and trying to stay away from harmful chemicals, I think I'm on the right track. Thank you!

Great information, not many people know the chemicals in products that run over your skin and or that are use on your skin can be absorbed and cause so much that we just figure is normal. Once you 've you've used natural products for a time, and then these chemicals get on you and you have a hot flash or headache. You will know why. Good luck and Really be free of chemicals and BE!!!

I am always worried about putting harmful chemicals in my body, and I feel more comfortable if I know exactly what are in the beauty products that I use. I purchased this book because I was interested in learning more about making my own shampoo. This book contains everything you

need to know about this subject. It included everything from why you should make the switch to homemade shampoo, to a huge collection of recipes. overall, if you are interested in making your own beauty products then you should read this book.

Against my better judgement, I tried her Coco Milk..... whatever shampoo. I'm 5' 6" tall with hair down to the middle of my butt. The recipe called for 1/4 cup of castile soap. I KNEW that was way too much, but hoped she knew what she was saying so I tried it anyway. She does NOT know what she's saying! It took an entire bottle of Argan oil to undo the damage I did to my hair. Feel free, folks, to use the recipes in this book. Just be warned that if the recipe calls for anything more than 2 tablespoons, cut the amount in half! And, as usual, with these free books; use spell-check! Plus this one has ingredients omitted from the ingredients list that are called for in the directions and one recipe I can think of where the description said olive oil, but the recipe used safflower oil!

Spell-check and proofread your own work, Jane Aniston!
